

Database Management Completed SPARK Reference

SPARK Sports Academy - question-by-question completed guide

REFERENCE EXAMPLE ONLY

Use this document to study the wording, steps, structure and quality of completed work. Do not submit, rename or copy this SPARK project as your own SBA.

Project: SPARK Sports Academy

Sector: Sports

Questions being answered

Task A - Tables

1. Create a database named SportsAcademy_YourFullName.accdb.

How SPARK completed it

- Open your database software and create a blank database.
- Save it immediately with the exact filename in the question.
- Keep the database and all later SBA files inside one organised project folder.

Completed result

SPARK reference filename: SportsAcademy_YourFullName.accdb.

2. Create the Athlete, Guardian and Programme tables using suitable field names, data types and primary keys.

How SPARK completed it

- Create Athlete first and enter the fields exactly as planned in your data dictionary.
- Repeat the process for Guardian and Programme.
- Choose the primary key before entering records. Check currency, date and numeric data types carefully.

Completed result

Completed table structures:

Athlete: AthleteID - Short Text, primary key, FirstName - Short Text, LastName - Short Text, DOB - Date/Time, Gender - Short Text with validation M or F, ProgrammeCode - Short Text, foreign key, JoinDate - Date/Time, MedicalNote - Long Text, Status - Short Text

Guardian: GuardianID - Short Text, primary key, AthleteID - Short Text, foreign key, FullName - Short Text, Relation - Short Text, Phone - Short Text, Email - Short Text

Programme: ProgrammeCode - Short Text, primary key, ProgrammeName - Short Text, MonthlyFee - Currency, Coach - Short Text, TrainingDays - Short Text

3. Enter realistic records and apply the validation rules required by the project.

How SPARK completed it

- Enter enough varied records to make your queries meaningful.
- Use validation rules for fields with a limited set or range of allowed values.
- Test the validation by deliberately entering one invalid value and confirming that the software rejects it.

Completed result

The SPARK completed database uses fictional records with different categories, dates, fees and statuses so every query can be tested.

4. Create the required relationships and enforce the correct links between the tables.

How SPARK completed it

- Open the Relationships window.
- Add all tables and drag each primary key to the matching foreign key.

- Check the real-world relationship before selecting referential-integrity options.

Completed result

Programme.ProgrammeCode 1-to-many Athlete.ProgrammeCode; Athlete.AthleteID 1-to-many Guardian.AthleteID.

Task B - Queries and Form

1. Create a query called Junior Athletes. Show AthleteID, athlete name, age and programme for athletes under 13. Sort by LastName ascending.

How SPARK completed it

- Add only the table or tables required by the question.
- Add the requested fields to the query grid.
- Enter the criterion: Age < 13.
- Run the query and compare every returned record with the source data.

Completed result

Query name: Junior Athletes. Criterion used: Age < 13.

2. Create a query called Athlete Finance. Join Athlete and Programme. Show athlete name, programme, MonthlyFee and TermFee.

How SPARK completed it

- Add the related tables and confirm the join lines are correct.
- Add the display fields requested in the question.
- Create the calculated field using: TermFee: [MonthlyFee]*3.
- Run the query and calculate one record manually to verify the result.

Completed result

Query name: Athlete Finance. Calculation used: TermFee: [MonthlyFee]*3.

3. Create Athlete Information Form with Guardian subform and Previous/Next navigation buttons.

How SPARK completed it

- Use the main record source for the parent form.
- Use the related table as the subform source.
- Add a clear title, useful instructions and navigation controls.
- Open several records and confirm the subform changes with the main record.

Completed result

Completed form design: Athlete Information Form with Guardian subform and Previous/Next navigation buttons.

Task C - Report

1. Create Programme Fees Report grouped by ProgrammeName, sorted by LastName, with average TermFee for each programme.

How SPARK completed it

- Use a query as the report source when it already contains the correct fields or calculation.
- Apply the exact grouping and sorting required by the question.
- Add the required summary in the group or report footer.
- Preview the report and correct clipped headings, blank pages and unreadable columns.

Completed result

Completed report: Programme Fees Report grouped by ProgrammeName, sorted by LastName, with average TermFee for each programme.

Completed database structure

Athlete

Field	Design
AthleteID	Short Text, primary key
FirstName	Short Text
LastName	Short Text
DOB	Date/Time
Gender	Short Text with validation M or F
ProgrammeCode	Short Text, foreign key
JoinDate	Date/Time
MedicalNote	Long Text
Status	Short Text

Guardian

Field	Design
GuardianID	Short Text, primary key
AthleteID	Short Text, foreign key
FullName	Short Text
Relation	Short Text
Phone	Short Text
Email	Short Text

Programme

Field	Design
ProgrammeCode	Short Text, primary key
ProgrammeName	Short Text
MonthlyFee	Currency
Coach	Short Text
TrainingDays	Short Text

Relationships

Programme.ProgrammeCode 1-to-many Athlete.ProgrammeCode; Athlete.AthleteID 1-to-many Guardian.AthleteID.

Sample records

AthleteID	FirstName	LastName	Age	ProgrammeCode	MonthlyFee	Status
A001	Alicia	Brown	12	SWM	9000	Active
A002	Dario	King	15	FTB	7500	Active
A003	Renee	Blake	11	NET	7000	Active
A004	Malik	Grant	14	ATH	8000	Active
A005	Jada	Campbell	13	SWM	9000	Active

AthleteID	FirstName	LastName	Age	ProgrammeCode	MonthlyFee	Status
A006	Andre	Lewis	10	FTB	7500	Active

Completed queries

Junior Athletes

Show AthleteID, athlete name, age and programme for athletes under 13. Sort by LastName ascending.

Criterion: Age < 13

Athlete Finance

Join Athlete and Programme. Show athlete name, programme, MonthlyFee and TermFee.

Calculation: TermFee: [MonthlyFee]*3

Completed form

Athlete Information Form with Guardian subform and Previous/Next navigation buttons.

Completed report

Programme Fees Report grouped by ProgrammeName, sorted by LastName, with average TermFee for each programme.

Final section check

- Every question in the practice brief has a visible completed result.
- The output uses the same project facts as the other sections.
- The work has been tested or checked rather than assumed correct.
- This SPARK example is watermarked and is for study only. Build your own teacher-assigned SBA.
